The real deal...

Your guide to using real nappies
and how to get £25 off!

www.recyclefornorthamptonshire.co.uk

What are Real Nappies?

Real Nappies are referred to as washable, reusable or cloth nappies which can be used again and again.

With real nappies you can put natural fabrics next to your baby's skin, plus you can save over £500 per child using cloth nappies, including the cost of washing.

If real nappies are washed at the recommended temperature, then they are one of the lowest energy options as Real Nappies can be up to 40% better for the environment than disposables.

This is one step parents can make to help reduce waste associated with raising children as well as making a difference to the world they will grow up in.

Real Nappy choices

The types of real nappies available are varied and it will come down to personal preference. The main types of nappies are:

Flat Nappy

E.g. Terry towelling sheet you fold into shape and put a waterproof wrap over the top.

Shaped Nappy

Like a flat nappy but shaped. A shaped nappy and waterproof wrap are also available as an all in one.

Wraps

A waterproof wrap is worn over a flat or shaped nappy.

Pocket Nappy/Stuffable

A shaped nappy with a pocket which you insert any pad or booster made from absorbent fabric into.

Liners

Biodegradable (flushable) paper or washable (cotton, silk and fleece) liners are placed inside the nappies to contain faeces.

Swim Nappies

A reusable shaped nappy is also available for swimming.

Swap to real nappies and you could save more than £500!

Washing and drying real nappies

- ▶ Modern washing machines wash so well that nappies do not have to be sterilised, scrubbed, or boiled.
- ▶ Boiling can reduce the life of the nappy and is costly to the environment and your energy bill!
- ▶ Keep used nappies in a dry bucket with a lid. Wash soiled nappies at 60°C. Nappies that are wet only can be added to a normal household wash at 40°C.
- ▶ Dry nappies on a washing line if possible, the sunshine will naturally bleach them. Otherwise dry them indoors on an ailer.
- ▶ Tumble drying reduces the life of the nappy and uses a lot of energy, which costs you more and contributes to climate change.

What you will need

(based on washing every 2-3 days)

- ▶ 18 – 24 nappies (24 for a new born, reducing to 18 as your baby moves onto solid food).
- ▶ At least 3 – 4 wraps
- ▶ Reusable or flushable liners
- ▶ A nappy bucket with a lid to store the used nappies
- ▶ A waterproof nappy bag for when you are out and about to transport the used nappies home

If you're interested in knowing if real nappies are right for you and your baby, you can trial a set by taking advantage of nappy loan kits available at Daventry Library.
